

Notes on {Medley}<internal>test>

<test> subdirs:

admin, ARs, env, GC, IO , LANGUAGE, Library, loops, lyric, Maiko, tools

<test>Top level files

README.TEDIT (this file)

TEST-RESULTS (contains log from running AUTO tests from 1988)

DOT.read-me-first (originally .read-me-first)

<test>4045> Deleted

<test>Maiko>

Subdir AUTO, OBSOLETE

Top level files moved to OBSOLETE

STACKHAX (has CHECKSTACKSPACE, seems to get tangled up in it's own stack)

STACKTAKESI (seems to cause a stack overflow on opurpose, which leaves stack clean enough that URAID hard-reset recovers from. Suspect timeouts aren't correct)

BAD-XREF (no compiled file)

display.cl (says "from Texas Instruments")

subdirs moved <ARs **optests** & .dfasl (**AuxHAND**
ENDLESSPUSHES **AR-TEST-CASES.Auto-log**

<test>Maiko>AUTO>

OPCODES.TEST

OPCODES.DFASL

may need EXPORTS.ALL to compile

most tests succeed

test BITBLT-DIAGONALS and BITBLT-SLOPED-LINES fail

A little hard to debug because the inspector for 2D

Another cop y of **bbtests** and **optests.lisp**

<test>Maiko>OBSOLETE>

Probably incorporated into AUTO>

AREF-TESTER

ARRAY-TESTER.TEST

FLOAT-TESTER

MAIKO-UNWIND-TESTS

TESTER (compiled OK)

unwindtest
xclopcodetests

<test>Library>

4045xlpstream> RS232 deleted
 CASH-FILE> only hand
 GCHAX>Auto>
 HASH-FILE> only HAND
 MatMult>Auto>
 TEdit>Hand-Aux> samples to TEdit
 WHERE-IS> only

<test>loops>

LOOPS-SETUP.TEDIT
LOOPS-TESTER-.... files

test>Lyric>

(old-versions of **DO-TEST .dfasl** and **.tedit**)

<test>Tools>

AUTOTEST.TEDIT (originql AUTOTEST.TEDIT-orig)
AUTOTEST & .DFASL framework for running tests

DO-TEST & .DFASL (copied newer version from Medley
 internal/library)

DO-TEST.TEDIT on Writing Software Tests
 (many other files not reviewed yet)
