SEdit test report

This report is for tests written and executed up to February 28, 1987 on the <Lyric>Basics>Full.Sysout generated 21-Jan-87.

The following tests are for the integration of the new error system into the Interlisp environment.

The test plan for this report is {Erinyes}<Test>Lisp>Lyric>Plans>SEdit.NoteFile

Groups of tests were written and executed on the 1186 for the following commands:

INTERRUPTS

ABORT BASE COMMENT **EVAL EXPAND EXTRACT FIND HELP** JOIN **MENU EDIT DEFINITION MUTATE PACKAGE PARENTHESIZE REDO** SKIP-NEXT **SUBSTITUE UNDO**

DELETE PREVIOUS WORD DONE REDISPLAY

These require user interaction. They are stored at {Eris}<Lispcore>Test>SEDIT>*.u

Still to be formally tested

The mouse, (shift selection (copy, delete, move) to and from each source:

- 1. The same SEdit
- 2. A different SEdit
- 3. TEdit
- 4. Exec (each type/profile)

Window. Test each window operation with SEdit in each of stand selection/caret situations. SEdit should reaapear in the same situation.

Completion. Make sure SEdit completes properly for each type of definition being edited.

- 1. def-types
- 2. fns
- 3. vars
- 4. property lists
- 5. records and datatypes.

Edit interface:

- 1. ed and editdef
- 2. df, dv, dc, dp
- 3. multiple edit drivers: editfromfile, editcallers, masterscope, etc...

New ARs generated

```
Not able to parenthesize part of an litatom
        SEdit, Meta-B does not work with decimals
7607 SEdit, problem with Base, change base and try placing edit caret, break
7624
        SEdit, Attach Menu, come up with incorrect Print-Base
7629
        SEdit, meta-E has trouble evaluating a number, breaks
        SEdit, meta-E, evaluates all, even when only part is selected SEdit, meta-E, something ought to happen with extended selection
7631
7642
7682
        SEdit, control-W after single quote breaks
7688
        SEdit, CASE on a string or litatom doesn't change the case
7699
