SourceFiles.tedit

The following is the list of files in either the Carol sysout or the current
lispcore sysout, showing those which we might not want to release the sources
of. The notes "<removed>" and "<added>" indicate files that were removed or
added to the lispcore loadup between the two versions.

Files in Lisp.sysout:

Subject: Restricted Sources Files?
To: LispCore↑.pa
cc: Sannella.pa
Reply-To: Sannella.pa

Beau has asked me to collect a list of the source files that we want to give to customers. Please send me (Sannella) the names of any source files you are responsible for which contain sensitive or proprietary information that should not be let out to the public at large. For each file, I would also like a few words of description of what it contains --- a sentence would be fine. I will compile the

results, and send out another message. Thanks.

NSFILING is definitely proprietary (implementation of Filing protocol).

I would also consider CLEARINGHOUSE sensitive for now. Even though
Clearinghouse protocol is now public, I think there may still be some things in that
file that aren't.

All the LAFITE* files, as well as GRAPEVINE, MAILCLIENT, MTP and
MAINTAIN are potentially sensitive. Of course, no customers are even getting the
dcom's of those, so there would be no reason to give them sources.

    Bill
