Uses: SAMEDIR.LCOM

INTRODUCTION

This package is an extension to the SAMEDIR Library package so that if AUTOSAMEDIRFLG is non-NIL, MAKEFILE will automatically switch to the directory its file argument was originally made to instead of invoking the SAMEDIR dialogue. (It uses the FILEDATES property of the file.)

Notice and Acknowledgement: This package was developed while the author was an employee of Applied Expert Systems, Inc. (Apex), Cambridge, MA. The author thanks the company for its support and assumes full responsibility for the contents and maintenance of this package.

SOFTWARE REQUIRED

AUTOSAMEDIR.LCOM

SAMEDIR.LCOM

FIXES

Extension to SAMEDIR package so that if AUTOSAMEDIRFLG is non-NIL, MAKEFILE will automatically switch to the directory its file argument was originally made to instead of invoking the SAMEDIR dialogue. (It uses the FILEDATES property of the file.)
